

(D-923AE/937SP/961SP/972AE/983/984VC)

NOTES ON USE

To use this module, insert it into the D-901 Digital Mixer. It is recommended that the D-901 firmware of version 3.00 or later be used. The version number can be confirmed on the D-901's front panel-mounted display.

[Display example]

TOA D-901 Series
Software Ver 3.00

If your firmware version is old, download the latest software program and the "D901 PC software instruction manual" from the TOA Internet site [<http://www.toa-products.com/>]. Refer to the instruction manual for module specifications and the procedures for module insertion, module settings at the D-901 unit, and firmware updates.

(For D-984VC only)

FCC REQUIREMENTS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

(For D-972AE only)

FERRITE CABLE CLAMP ATTACHMENT

To reduce electromagnetic noise, place the supplied ferrite clamp over each digital output cable when making a cable connection.

Install one ferrite clamp per digital output cable.
